

Volker has built its reputation in Ammonia industrial with its uncompromising safety, integrity, reliability, and project execution. We are a specialized company with focus, to create unparalleled personalized customer service with special attention to your company

- 26 year of experience in Ammonia Industry
- Ammonia Retrieval System (ARS) and safety products.
- Experience of 162+MT of Ammonia decommissioning

Ammonia Retrieval System & Safety Products

Ammonia Retrieval System (ARS) is under process for its design patenting and environment friendly system to retrieve Ammonia from existing plant and machinery. Ammonia retrieved is recyclable and can be recharged back to the existing plant, which enable to protect environment and saves cost of Ammonia procurement.

Where it can be used

- For maintenance shutdown of Ammonia base refrigeration plant, Cold Storage, Ice Factory
- Maintenance of pipelines, Ammonia receiver, Compressor pumps
- Decommissioning of Ammonia refrigeration plant

Benefits

Safety: With proprietary design and proven system to remove Ammonia from exiting plant without putting human life in danger.

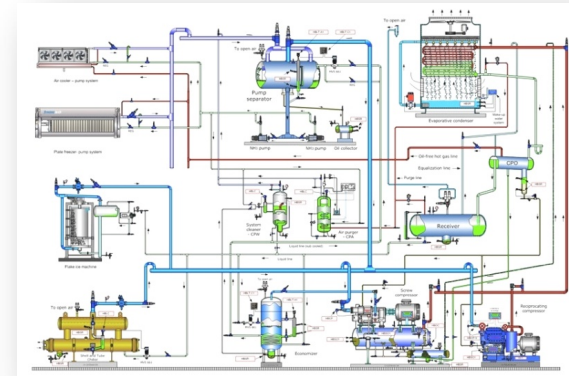

Safest way to handle Ammonia gas for plant up gradation and maintenance activity.

Environment: Removed Ammonia can be reused or recharged into the plant, hence having no environmental waste or zeroTM environmental impact.

Cost: As retrieved Ammonia is recyclable, it reduces cost of procurement.

No need to buy Ammonia retrieval system, it's available as part of our service.

Ammonia Retrieval System

Our Mission

zerO™ in Incident, **zerO™** in Exposure,
zerO™ in Environmental impact and
zerO™ gauge for Ammonia in system is
our motto and we have been achieving it

Other Safety Products

Ammonia Leak Control Kit

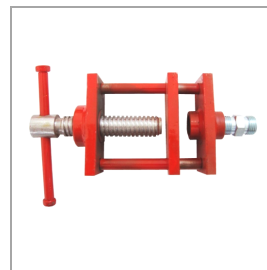

Ammonia safety kit for leak control from Ammonia and Chlorine IS cylinder

Personal Breathing Apparatus

Breathing Apparatus best suited for Ammonia industry.

Valve Clamp Assembly

Ammonia / Chlorine valve clamp for safely retrieval for liquid gas from cylinder and tuners.
